**SAN GABRIEL VALLEY CLEANUP PROGRAM – OVERDUE ANALYTICAL REPORT,  
SOUTHERN CALIFORNIA EDISON COMPANY AT 2244 WALNUT GROVE AVENUE  
(FILE NO. 107. 1786)**

Dear Mr. Rapan:

Reference is made to our letter dated April 19, 1999 in which we required you to submit an analytical report containing perchlorate data by June 15, 1999. To date, we have not received the required report. Since our original request, other emergent chemicals have been detected in aquifer tests in USEPA wells in South El Monte. So far, the list of emergent chemicals that we are monitoring includes perchlorate, MTBE, 1,4-dioxane and N-nitrodimethylamine (NDMA). The detection limits for these chemicals are 4, 10, 2 and 0.033 ug/L respectively.

Your analytical report should include data for all four listed chemicals for the five groundwater monitoring wells at the subject site. In order to avoid appropriate enforcement action by this Regional Board, two copies of the required report must be submitted to this office by August 7, 1999.

Regional Board staff are prepared to meet with you and/or your representatives to develop an analytical report that will address our concerns and minimize the impacts on your business. If you have any questions concerning this matter, please contact E. G. Solomon at (213) 576-6727.

Sincerely,

  
ARTHUR G. HEATH, Ph.D.  
Environmental Specialist IV

cc. Ms. Bella Dizon, USEPA, Region IX

**California Environmental Protection Agency**

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.
